## B-D® ADMIXTURE NEEDLES, NON-CORING

Eliminates the medication waste and patient risk associated with rubber coring. The NO-KOR needle's scalpel-like tip glides through the vial stopper quickly and easily. The scalpel like tip also allows use of a large gauge needle for fast medication preparation without the risk of coring and the NO-KOR Needle eliminated the nuisance of foaming by directing fluid toward the side of the vial.

## IV SOLUTIONS

Pieces are available for most IV solutions, please call us for more information.

Most IV Solutions bags are:

- ✓ PVC-Free
- ✓ DEHP-Free
- ✓ Latex-Free
- ✓ Excel and PAB containers feature biologically inert, non-toxic plastic construction.
- ✓ Excel containers are environmentally safe. Upon incineration, they form carbon dioxide gas and water. In landfills, they require less space and will not leach harmful chemicals into the soil or ground water.

## Isolyser System:

The product includes an opaque bottle partially filled with a proprietary solution. Once the bottle is full of sharps the catalyst is added to the base solution and exothermic reaction disinfects the contained material. The liquid then solidifies. Once solidified, the container can be safely relabeled as decontaminated solid medical waste, placed upside down in the shipping Box and disposed of in the regular trash or dump. For those few jurisdictions that do not yet allow disposal of SMS treated sharps in the regular trash, our 'mail back option' can be utilized; you simply send us your activated SMS container for disposal.

### ACCU-CHEK® Aviva system

#### Easy, accurate monitoring

By providing fast, accurate results and making self-testing comfortable and convenient for patients, the ACCU-CHEK Aviva system helps reduce patient frustration and encourage regular blood glucose testing.

#### Advanced design to help make every strip count

- Innovative strip technology designed to result in less retesting, fewer fingersticks; 97% of users dosed test strip on first try.<sup>1</sup>

#### Accurate results

- 8 electrodes work in conjunction with the meter to perform 198 built-in integrity checks, detecting and preventing unreliable results.
- Screened at 3 glucose levels for potential interference from 175+ medications/metabolites.<sup>1</sup>

#### Easy, "pain-free" testing

- Simple 2-step testing with accurate results in 5 seconds
- Virtually pain-free testing with optional alternate site testing and two lancet devices.<sup>2</sup>
- Wide "Y" dosing area with capillary fill feature makes it easier for patients to fill strip on first try.

\$12.99

**SPECIAL  
OFFER**

### Reagent Strips for Urinalysis

- Vitamin C**  
(For in Vitro Measurement of Urine Vitamin C)
- pH**
- Ketone**
- Merit-Check 3 strips are designed for in vitro measurement of urine Vitamin C, pH and ketones.
- Test results may provide information regarding the status of carbohydrate metabolism, kidney and liver function, acid-base balance, and bacteriuria.
- Merit Check-3 strips are packaged along with a drying agent in a plastic bottle with a twist-off cap. Each strip is stable and ready to use upon removal from the bottle. The entire reagent strip is disposable.
- Results are obtained by direct comparison of the test strip with the color blocks printed on the bottle label. No calculations or laboratory instruments are required.

### TEST PRINCIPLE:

**Ketones:** this test is based on the reaction of acetoacetic acid with sodium nitroprusside in a strongly basic medium. The colors range from beige to buff-pink color for a "Negative" reading to pink-purple for a "Positive" reading.

**pH:** this test is based on the well known double pH indicator method, where bromothymol blue and methyl red give distinguishable colors over the pH range of 5-9. The colors range from red-orange to yellow and yellow-green to blue-green.

**Ascorbic Acid:** this test is based on the action of a complex chelating agent with a polyvalent metal ion in it higher state and an indicator dye that can react with the metal ion in its lower state to produce a color change from blue-green to yellow.
